Android signing note: local debug keystore signing was verified. The AAB jarsigner check reports expected self-signed certificate and no timestamp warnings, so these are verified local artifacts but not Play-upload-ready release credentials.

iOS signing note: archive is Apple Development signed by Apple Development: Ali Hussain Khan (JGXF4R39DG), team LJ48CVC23W. It is a verified local archive, not an App Store distribution export.

User-Facing And Technical Changes

User-facing: visible version remains 1.0.1, while store/test build identifiers advance to 24. The original Lookmefy LM/hanger launcher icon is restored on both iOS and Android.

Technical: app.json, Android Gradle defaultConfig, and Xcode project build settings remain on build/versionCode 24. The iOS app icon catalog, Expo icon assets, and Android mipmap launcher resources were regenerated from the Lookmefy symbol asset.

Source-history note: fit-look-APP/ is ignored by the root .gitignore, so binary confidence comes from direct artifact verification instead of Git status.

Verification Results

- Expo public config confirmed version 1.0.1, iOS buildNumber 24, Android versionCode 24.
- Gradle assembleRelease and bundleRelease completed successfully after the icon restoration.
- aapt confirmed package com.lookmefy.app, versionCode 24, versionName 1.0.1, min SDK 24, target SDK 35, compile SDK 35.
- apksigner verified the APK and printed the local debug certificate fingerprints.
- jarsigner signed/verified the AAB content with expected self-signed/no timestamp warnings.
- xcodebuild archive completed from FitLook.xcworkspace; archive Info.plist and app Info.plist confirmed version/build and signing facts.
- Embedded iOS AppIcon60x60@2x was rendered and visually confirmed as the Lookmefy LM/hanger icon.
