

Lookmefy Android Release Report

Version 1.0.2 / Android versionCode 21 - generated 2026-09-11 16:10 IST.

Final result: READY TO UPLOAD TO GOOGLE PLAY for the AAB artifact. The APK artifact is provided for direct device testing/internal testing, not Play Store production upload.

Version Metadata

App name	Lookmefy
Expo owner/project	@office50505/lookmefy
Expo slug	lookmefy
Android package	com.lookmefy.app
Version	1.0.2
Android versionCode	21
Expo SDK	53.0.0
iOS bundle/build observed	com.kratikdhote.lookmefy / build 22 (not rebuilt in this Android release task)

Build Configuration

Project directory	/Users/kratik/Desktop/ytry-main copy/Lookmefy-Unified-Backend/fit-look-APP/mobile
Production AAB profile	eas.json build.production: distribution store, android.buildType app-bundle, autoIncrement false
APK profile	eas.json build.production-apk: distribution internal, android.buildType apk, autoIncrement false
Production API env	EXPO_PUBLIC_API_URL=https://api.lookmefy.in/api
Native Android identity	android/app/build.gradle namespace and applicationId are com.lookmefy.app
Native release signing config	release build type has no debug signingConfig; EAS-managed release/upload credentials were used remotely

EAS Build Records

AAB build ID	2d1707f4-a722-4605-838f-6aea4f1893a0
AAB build URL	https://expo.dev/accounts/office50505/projects/lookmefy/builds/2d1707f4-a722-4605-838f-6aea4f1893a0
AAB completed	2026-09-11T10:26:42.829Z, distribution STORE, profile production
APK build ID	78a47624-4eff-458f-a3ed-3d74a89b131a
APK build URL	https://expo.dev/accounts/office50505/projects/lookmefy/builds/78a47624-4eff-458f-a3ed-3d74a89b131a
APK completed	2026-09-11T10:38:03.751Z, distribution INTERNAL, profile production-apk

Artifacts

AAB path	fit-look-APP/releases/lookmefy-1.0.2-build21/lookmefy-1.0.2-21.aab
AAB size	63,014,966 bytes
AAB SHA-256	d117f6757e56d502bb4bf4f10b5a75a78e40aa3b45b1fa965e69caef362dbb5d

APK path	fit-look-APP/releases/lookmefy-1.0.2-build21/lookmefy-1.0.2-21.apk
APK size	84,146,515 bytes
APK SHA-256	78f4c6905b35e7e1973d57628a6ee2a938acc8be25224ac29cb4f1d3622d8392
Convenience copies	fit-look-APP/mobile/release/lookmefy-v1.0.2-vc21.aab and .apk with matching SHA-256 hashes

Binary-Verified Android Facts

APK package/version	com.lookmefy.app, versionCode 21, versionName 1.0.2
SDK levels	minSdk 24, targetSdk 35, compileSdk 35
Native ABIs	arm64-v8a, armeabi-v7a, x86, x86_64
APK signing	apksigner: Verifies; v2 signature true; signer count 1
Signing certificate SHA-256	B0:10:B9:A7:B0:07:FC:50:CE:CA:AD:78:EB:FF:2C:58:69:BD:E4:C1:47:08:F2:DD:AD:D9:7F:8F:63:C7:3D:83
AAB signing	jarsigner: jar verified; certificate SHA-256 matches APK certificate
Certificate validity	2026-09-11 15:47:45 IST to 2054-01-27 15:47:45 IST
Debug signing check	Current certificate does not match the prior debug certificate FAC61745... and release build no longer references signingConfigs.debug

Manifest Permissions

android.permission.INTERNET; android.permission.READ_EXTERNAL_STORAGE; android.permission.RECORD_AUDIO; android.permission.SYSTEM_ALERT_WINDOW; android.permission.VIBRATE; android.permission.WRITE_EXTERNAL_STORAGE; com.android.vending.BILLING; android.permission.FOREGROUND_SERVICE; android.permission.FOREGROUND_SERVICE_MEDIA_PLAYBACK; android.permission.CAMERA; android.permission.ACCESS_NETWORK_STATE; com.lookmefy.app.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION

Verification Results

Expo config	npx expo config --type public reported Lookmefy / lookmefy / com.lookmefy.app / 1.0.2 / 21
Expo Doctor	17/18 checks passed; one non-CNG sync warning remains because native android/ios folders exist
Archive integrity	unzip -t found no compressed-data errors for both AAB and APK
AAB format	ZIP archive with BundleConfig.pb, base module files, and META-INF signature entries
APK manifest	aapt dump badging verified app label Lookmefy and package/version fields

User-Facing Changes

No new user-facing feature changes were intentionally made in this release task. This release is focused on producing correctly release-signed Android artifacts for testing and Play Console upload.

Technical Changes

Incremented Lookmefy Android release metadata from 1.0.1/versionCode 20 to 1.0.2/versionCode 21. Linked the Expo project to office50505, preserved existing profiles, configured production AAB output, added a separate production-apk profile, removed the empty fallback API env from EAS profiles, and removed debug signing from the native release build type.

Comparison With Previous Release 1.0.1 / versionCode 20

Previous baseline	1.0.1 / versionCode 20, APK 84,135,051 bytes, AAB 63,008,131 bytes
-------------------	--

New release	1.0.2 / versionCode 21, APK 84,146,515 bytes, AAB 63,014,966 bytes
Signing difference	Previous build20 was documented as debug-signed. New build21 uses EAS-managed release/upload key SHA-256 B010B9A7... and is not signed with the previous debug certificate.
SDK difference	Both current APK verification and build20 history record minSdk 24, targetSdk 35, compileSdk 35
Readiness difference	Build20 was not suitable for Play upload due to debug signing. Build21 AAB is Play-upload ready.

Warnings And Confidence Notes

Expo Doctor warning remains for non-CNG native config sync. This is acceptable for this build because the native Gradle values and binary metadata were verified directly. The AAB certificate is self-signed, which is normal for Android upload keys. Google Play App Signing will handle distribution signing after upload. EAS artifact URLs may expire, so local artifacts are the durable copies. The working tree showed no tracked dirty changes when checked during verification.

Conclusion

The AAB is a production/store Android App Bundle for com.lookmefy.app, version 1.0.2, versionCode 21, signed with the EAS-managed release/upload key. Final result: READY TO UPLOAD TO GOOGLE PLAY.
